AREA VARIANCE NARRATIVE

Address each of the following items below to the fullest extent feasible, attach extra sheets if needed.

1. Describe how the proposal will not create an undesirable change in the character of the neighborhood or create a detriment to nearby properties if the area variance(s) were to be granted.

   The agricultural character of the local community will remain unchanged. The purpose of the variance requested is to allow the current owner to subdivide a portion of the referenced parcel for sale of a portion thereof, which was previously farmed by the current owner, to another local farming operation. Current owner wishes to preserve his current historical residence, but by doing so he shall fall short of the creently required road frontage.

2. Describe how the proposal cannot be achieved by a feasible alternate method other than the area variance(s).

   The current owner of the property is a member of a family that has owned the parcel, and adjoining parcels, for several generations. As the current owner of the fallow land that he previously farmed advances in age, his wish is to relieve the tax burden imposed upon property that he no longer profits from, merely wishing to retain his historical residence. In order to do so he hereby requests a variance from the currently required road frontage. There appears to be no alternative possible.

3. Describe how the requested area variance(s) is/are not substantial.

   According to local requirements, a non-lakefront parcel located in an agricultural zone requires 400' of road frontage. Robert C. Reynolds, current owner of the property referenced, seeks to reduce his frontage to 193.10' from the current frontage of 873.11'. The purpose is to induce the contracted purchaser of a portion to be subdivided, Bergen Farms. to move forward and place the subdivided portion back into agricultural production as it now lies fallow and the owner wishes to not see the land waste. Why the reduction of required frontage of slightly more than 50% appears substantial, it must be noted that such a variance would not impose any change of character of the rural nature of the surrounding environment.

4. Describe how the proposed variance(s) will not have an adverse effect or impact on the physical or environmental conditions in the neighborhood or district.

As previously stated herein above, there would be no change in the visual, physical, or environmental character of the neighborhood; in fact, by granting the proposed variance, the Town would be saving agriculturally productive land from wasting.

5. Describe how the difficulty for the proposal to comply with code regulation(s) is not self-created.

In order to subdivide and allow the portion of this parcel to be conveyed and thereby returned to agricultural production, the proposed buyer would require significant access as well. Currently, the current owner is burdened by increasing taxes on land that he no longer profits from.

6. Describe how the granting of the area variance(s) will not create a detriment to the health, safety, and welfare of the neighborhood or community.

As stated above herein, there will be no change in character or historical use of the property to be conveyed or the portion that the current owner seeks to retain.
